

Strategic Planning ©: Build Your Blueprint

The PLC Associates, Inc. Approach...Organized, Efficient and Affordable

Welcome to the “Next Level” of Strategic Planning

We will start by discussing your interests. What is it you want to achieve? Each time we work with a district or school, keeping the fundamentals in place, we execute differently. This is critically important, as the process must result in *exactly* the outcomes you want.

Our processes are **data-driven, research-based, comprehensive, and inclusive.** We see our role as providing key levels of support, facilitation, and guidance so that *your energy* may be directed toward insightful thought, dynamic discussions and planning for your schools.

Beginning to end, **we will assist and support you in setting up** the Core Team, determining Task Forces for the areas that the district wishes to focus on, designing communications, developing agendas, facilitating strategy sessions, organizing data, collecting input from key stakeholder groups – staff, community, and students and structuring our meetings so we are *set for results.*

Our publications: [The PLC Handbook for Strategic Planning](#) and [Task Force Workbook](#) are provided. They are filled with clear examples, protocols, and activities, which allow us to *be streamlined* and efficient.

We use a sequential, clear, methodical process which quickly jumpstarts the work. As a result, your district will **gain a clear blueprint** for the path forward with staff and community *united, energized and ready to implement* a “game changing” strategic plan.

***PLC Associates is known and respected for a successful track record.
Penny Ciaburri, designer of the protocols and methodology has worked in
over 400 schools, with twenty-five years in education.***

**We design our model to you, your district, and your interests.
First Question: Where do you want to be in five years?**
